Software Engineer

Proven skill in full stack software development, primarily in property management. Reliable collaborator, team member, and developer of specs and projects. Analyzes and develops web pages for clients, examines client and developer facing documentation to produce specs for web pages.

Full stack developer	Property Management	Single Family Homes
Visual Studio	VB.NET	HTML
CSS	JavaScript	SQL Server
C++	C#	Python
MVC	SSRS	ETL
Database Schema		

Professional Experience

Software Developer Engineer: Yardi Systems Inc. Jul 2018 – Jan 2021

Full stack development with the .NET framework. Used the ASP.NET Web Forms and ASP.NET MVC models to create dynamic web pages. Used SQL Server to create backend solutions. Used Yardi's proprietary SSRS language to produce reports. Used ETL to import data objects in bulk from CVS files. Extensively used the Visual Studio IDE

- Designed schema and dynamic web pages for clients managing single family homes.
- Used ETL to import large amounts of data and created applications for bulk data conversion for clients managing single family homes.
- Refactored and maintained Code for clients managing military housing.
- Used a Proprietary SSRS language to produce reports for clients managing military housing and single family homes.

Additional Relevant Experience

- Received a college grant to attend a Stanford workshop called "Designing Musical Games :: Gaming Musical Design."
- Participated in the 2015 AMC-ICPC regional programming competition.

Education

University of California, Santa Barbara
June 2018, BS Computer Science
